

Hello,

My name is Jim Frantz and I've already had the pleasure of meeting many of you reading this, either during community events or by working at your home with my company Frantz Electric. To those of you I haven't met yet I am pleased to have this opportunity and hopefully will connect with you soon.

We all know that our economy is not good, right now.

If you are like me, you have been searching for a way to lower your monthly bills, and make more money to support your family now and in the future.

This winter a close friend came to me with an amazing opportunity.

It was like an answer to my prayers. This opportunity accomplished exactly what I was looking for: saving and making more money.

My friend and I were speaking in January and he shared something that had been life changing for him. He asked me if I knew about deregulation of energy. Because I am an electrician I was a little embarrassed to say "I had heard some about it but did not really understand what was going on."

Well, he proceeded to explain that Deregulation has come to Pennsylvania and we are now free to shop for different generation suppliers. This means savings for us as consumers on this life essential service. Who doesn't want to save money on their electric bill?

More importantly, he shared with me, how I can be paid on hundreds or even thousands of energy bills. And that this opportunity is recession proof. He said "think about it People will stop paying their mortgage before they will take a cold shower in the dark."

Now, I have to be honest with you. "At first I said I am too busy". I have a wife two children and an electrical business. I don't need anything else to do!

But, when my friend showed me how simple the plan is and that I can put as much or as little time into it as I want. He said "this is a business that busy people do in the nooks and crannies of their already busy life" and that made sense to me.

He said deregulation of energy will only happen once and that time is now.

He told me, Warren Buffet said "deregulation of energy will be the largest transfer of wealth in US history" My friend then asked me if I want to get a piece of that transfer of wealth for my family, to improve our quality of life or just let the opportunity pass by. That night I could not sleep. My brain was buzzing. I laid their in bed and realized that my friend was right. This was life changing for him and if I took action, it could be life changing for me and my family as well.

I realized People's desires and dreams are commonly never achieved because they were afraid to take action and pursue them. Many people now days have actually stopped dreaming. That is a sad fact in our great country today. They find themselves stuck living a life they never intended to live. I have found a way to change my family's life and dream again.

The truth is that when a once in a life time opportunity like this comes along (remember the energy industry will only deregulate once and it is happening now). There will be two types of people. Those that are glad they took advantage of the opportunity and those that wish they had. I decided right then and there that I would be one of the people that were glad they did. That I was not going to let this opportunity for my family's future slip past me without grabbing it.

I am sharing this story with you because this is a business that anyone can do. It has the ability to change your life. You can save money on your energy bill and make money when others pay theirs. You do not need to be an energy expert to do this. This program is set up for everyone in all walks of life to succeed. If you have been searching or praying for more in your life, more time, more

money or more meaningful relationships. This may be the answer to your prayers like it was for me.

As you can probably tell I am very excited about this and grateful to my friend for taking the time to share this amazing opportunity with me. The fact that I am so grateful to my friend is the real reason I am writing this to you. I know that if this can be life changing for me and my family it may be for you and yours also.

I feel an obligation to share this opportunity with you.

I want to recap why you may want to get some free information from me about this simple plan and how it can help you.

1. Its Energy. Everyone is already using it. It is free to switch providers and you can save some money.
2. Its deregulation. This will happen only once and that time is now.
3. National Expansion. This is a ground floor opportunity. You are hearing about this at the beginning. That means tremendous potential for growth in the next few years.
4. Residual Income. This means you do the work once and get paid month after month every month because people will continue to pay their electric bills.

If you are like me and know that a few years from now you don't want to be saying I wish I had.

Give a call for additional information 570-325-5001

You have nothing to loose it is free information. Just me sharing an opportunity that changed my friends life, is changing mine and just might be the answer to what you have be searching for.

Looking forward to hearing from you soon,

Jim Frantz
